Park and Red Bank was honored as the Medium Company of the Year. Premiere Media, LLC of Hillsborough was honored as the Small Company of the Year.

Bayway Refinery, one of Phillips 66's 12 US refineries, has operated for more than a century and is one of the largest refineries on the East Coast, processing crude oil into a variety of products, such as gasoline, diesel fuel, jet fuel, home heating oil, propane, butane and fuel oil, as well as many familiar consumer goods from their world-scale polypropylene (plastics) plant. The refinery has a significant economic impact to the local communities and New Jersey, providing 1,100 direct jobs. Bayway Refinery produces enough gasoline to meet more than half of New Jersey's annual demand.

The Gateway Regional Chamber of Commerce is the largest business association in the New York/Northern New Jersey Region, comprising 12 regional and local chambers. With 1,200 members, the Gateway Regional Chamber of Commerce has a 95 percent retention rate, the highest in the country.

## CAT IN THE HAT VISITS LINDEN SCHOOLS

Linden Public Schools had a special guest visit their schools on February 8, 2017. The authentic Cat in the Hat came to visit School No. 1, 2, 8, and 10 to promote reading for "Read Across America". The children's book author Dr. Seuss was born on March 2, 1904 and his birthday serves as the kickoff to the NJEA's "Read Across America" initiative, which promotes literacy and is celebrated across the country. The schools entered a contest through the NJEA website for the Cat to visit the children. As the Cat in the Hat walked the hallways and entered the gym, and cafeteria one can hear gasps and the eruptions of cheers. The children were amazed by how tall the Cat in the Hat was in person.

Students in Pre-k to 5th grade are preparing for Read Across America by reading Dr. Seuss' books. The students were in the gym, halls and cafeteria all dressed in red, white, and black, the Cat in Hat colors. The students in all the schools had an opportunity to share their stories with the

cat, gave it high-5's and hugs as they smiled ear to ear. All the schools emphasized how important Dr. Seuss was to reading and how important reading is to everyone. This was a kick-off event for Read Across America with many family involved activities planned in the coming weeks.

(above) School No. 1 Kindergarten teacher Karen Mulligan and her students showed the Cat in the Hat their bulletin board. The students held various characters from the many Dr. Seuss books that were read in class.

## AFRICAN VIOLETS

African Violets have long been the most popular flowering houseplants in the country and will continue to maintain this distinction far into the future. African Violets are not actually violets but are a genus (species) "Saintpaulia" related to Gloxinia, originally from Kenya and Tanzania, Africa.

One reason for its popularity is its ability to flower in indirect light and easy care. African violets are short plants with rounded or slightly pointed leaves with flower stalks emerging from the center. Flower colors range from white, pink, red, purple and blue with a yellow center. There is also a creeping variety which is less well known. Flowers have five single petals although now double flower are available as well as fringed and multi-colors varieties which seem to be created every day. Even variegated leaves of white and green can easily be found.

The abundant flowers bloom well with indirect sunlight all year long which help make African violets as popular as they are. They also prefer modern indoor temperatures of around sixty five degrees which is ideal. Most houseplants prefer cooler temps at night. Additionally a fully mature plant only requires a three to six inch pot making them ideal for window ledges, shelves or coffee tables. All these traits make African violets perfect flowering houseplants plant for almost everywhere in an apartment or house with enough indirect or good artificial light.

Considered an easy to care for plant, it is important to remember that African violets come from a warm climate. Water them with room

(above) President of The Rahway Garden Club, James Keane has been researching and answering garden questions since 1995. Visit 'Keane Gardener' blog at: [keanegardener.blogspot.com](http://keanegardener.blogspot.com)

temperature water. Cold water causes yellow spotting on the leaves. Also avoid wetting the leaves when watering. Watering plants from the bottom is a good practice and let them dry out between watering. Overwatering can cause root rot, the most common cause of death of all houseplants. Also avoid drafts. Move away from cold drafty windows and air conditioners.

Easy and fun to propagate, you can take a leaf with the stem from the center of the plant and root it in water or potting soil. The outer leaves are too thick and do not root easily. Once rooted African violets grow quickly to flowering size. Off shoots from the main plant are best removed and to its own pot.

Requiring a rich soil mixture, you can purchase African violet soil premixed or you can blend your own, but they will not grow well in regular potting mix.

For more information on African violets visit the website of the: 'African Violet Society of American' ([www.AVSA.org](http://www.AVSA.org))

Happy Indoor Gardening,

*James*

## LITTLE RED HATS WARM HEARTS IN A BIG WAY AT TRINITAS

Trinitas Regional Medical Center is joining the American Heart Association's Little Hats, Big Hearts program to raise awareness of family heart health and congenital heart defects, the most common type of birth defect in the country. The campaign coincides with Congenital Heart Defect Awareness Week in February, and aims to empower new moms to take charge of their own wellbeing while starting a healthy lifestyle for the entire family.

As part of the Little Hats, Big Hearts program, babies born at Trinitas during the week of February 7 received a red knitted or crocheted hat, and a kit full of heart-healthy information for mom and baby. The kit includes tips on raising healthy children, heart-healthy workouts that can be done at home, recipes, and information on congenital heart defects.

"More than 40,000 infants are diagnosed with congenital heart disease each year. At Trinitas all of our newborns receive a critical congenital

heart disease screening before they go home, but some heart defects don't become known until the child is months or years old," states Gary S. Horan, FACHE, President & CEO of TRMC. "This is why we are so pleased to be part of a program that educates parents on congenital heart disease and informs them of symptoms they should look out for as their child ages."

Trinitas distributed nearly 100 kits during Congenital Heart Defect Awareness Week. Congenital heart defects are structural problems with the heart present at birth. They result when a mishap occurs during heart development soon after conception and often before the mother is aware that she is pregnant. Defects range in severity from simple problems, such as "holes" between chambers of the heart, to very severe malformations, such as complete absence of one or more of the heart's chambers or valves. According to the American Heart Association, it's possible to fix most congenital heart defects and

there are an estimated 2 million CHD survivors in the United States.

Trinitas maintains a full-service cardiac facility as well as facilities for the intensive nursing care of patients with cardiac disease. These include a cardiac care unit, intermediate coronary care unit, cardiac catheterization lab, non-invasive cardiology services, full-service emergency department, and cardiac rehabilitation services. Trinitas and the American Heart Association hope to spread awareness about the advantages of a heart healthy family lifestyle to new mothers and families during American Heart Month in February.

## THE THERAPY DOG READING PROGRAM

On February 10th, School No. 6 teacher Mrs. Jen Sousa-Redgate and Sch. 6 Social Worker Jamie Bodden started a therapy dog reading program to improve the students reading and writing skills by having them read and write

letters to the dogs. The dogs are certified and insured through Bright and Beautiful Therapy Dogs. Since starting the program, the students have shown improvement in their oral reading skills. In addition, the dogs visit classrooms throughout the year, and are used to educate the students about dog safety.

## KEVIN STANICKI IS LINDEN'S NEWEST OFFICER

On January 4th, 2017 Linden's newest Police Officer Kevin Stanicki was joined by family and friends during a short ceremony as he was sworn into the department. For Kevin, who worked for Camden County Metro PD and the Union County Prosecutors Office before being hired in Linden, it was a dream come true "Since I was young, I always wanted to be a Linden Police Officer" said Kevin.

It isn't hard to understand Kevin's love for LPD. His father, Lou Stanicki, spent 26 years with the department until he retired as a Detective in 2006, and his cousins Danny and Gary also worked here. Gary retired as a patrolman in 2001 and Danny retired as a Detective in 2008. Officer Kevin Stanicki will carry same badge number his Father Lou did as a patrolman. Lou called the day "one of the proudest moments he could have as a parent." He added "It was great to see so many people come out to support Kevin today."

Chief Jonathan Parham praised the Stanicki family for their service to the citizens of Linden. "We are very proud to have Kevin join the Linden Police Department. Kevin comes from a

great family with a tradition of service to our community, and his experience in community policing will allow him to make an immediate impact here in Linden."

(above) On January 4th, 2017, Kevin Stanicki was sworn in and became Linden's newest Police Officer.

## SCIENCE EXPERIMENT AT SCHOOL NO. 1

Kindergarteners in Miss Jennifer Bartolomeo's class at School One recently learned about wood and paper. The students learned that wood has many measurable properties. The class completed a science experiment to see what happens when different types of wood get wet. The students

used their sawdust from their sanding experiment the week before to compare with wood shavings. After the students compared and contrasted the different types, they mixed them together and put half of their mixture in water to observe what happened.

## SCHOOL # 5 BLACK HISTORY MONTH

"In honor of Black History Month, Miss Marissa Scorese's 4th grade class at School 5 learned about the Under Ground Railroad quilts patterns that were used by conductors to signal to others what was going on. Each pattern represented a specific sign for them to use and direct slaves to freedom. Miss Scorese shared an experience from her childhood where she was able to see a real area made for the Underground Railroad in the north, which her aunt had underneath her kitchen when she was their age. They enjoyed listening to her story about it and the artifacts that she saw within the area in the house. Students are also reading aloud for the "Night at the Apollo", assembly, African American inventors A-Z. They researched and made posters of each person and what they invented. Linden School No. 5 will be hosted "Showtime At The Apollo" in February.
